

PROFESSOR DR HAB. ADOLF RIEDEL FEBRUARY 24TH 1930 – AUGUST 21ST 2010 OBITUARY

Our friend, colleague, teacher and honorary member of the Association of Polish Malacologists, Professor Adolf Riedel, died on the 21st of August 2010, at the age of eighty and after 60 years of scientific work. The science lost an outstanding researcher, the World's best specialist in the Zonitidae. We lost a friendly person who could never refused us his help.

Council and Members
of the Association of Polish Malacologists

ABOUT PROF. DR HAB. ADOLF RIEDEL

Professor Adolf Riedel was among the most outstanding contemporary malacologists and the World's best specialist in zonitid snails. He published more than 170 original scientific papers and numerous reviews, encyclopedia entries and congress abstracts. His papers appeared in a variety of Polish and foreign journals, most often in German or English. He described 160 new snail taxa. More than 40 names of animal taxa, dedicated to him by other authors, were derived from his name or surname. He reviewed applications for professorship, habilitation theses and doctoral theses of most of mollusc specialists in Poland. He was author of numerous editorial reviews and was very often asked for consultation.

Professor Riedel was a quiet, unassuming and always friendly person. When arguing, he was resolute, determined, and his argument was always unambiguous. He was an excellent, thorough and incisive editor, expressing his opinions in a categorical but always friendly way. Nearly all the Polish malacologists and many foreign colleagues owe much to him.

His most important publications are:

Zonitidae (excl. Daudebardiinae) der Kaukasusländer (Gastropoda). *Ann. Zool.* 24 (1966): 1–303.

Arionacea – ślimaki krężalkowate i ślinikowate (Gastropoda, Stylommatophora). *Fauna Polski.* 2, PWN, Warszawa (1974): 140 pp. (with A. WIKTOR)

Genera Zonitidorum. Rotterdam (1980): 91 pp.

Ślimaki lądowe. Gastropoda terrestria. Katalog Fauny Polski 36 (1988), PWN, Warszawa: 315 pp.

Zonitidae sensu lato (Gastropoda) of Greece. *Fauna Graeciae* 5 (1992), Athens (1992): 8 + 194 pp.

Genera Zonitidorum – Addenda et corrigenda. Warszawa (1998): 197 pp. +39 maps.

CURRICULUM VITAE

Professor Adolf Riedel was born on the 24th of February 1930 in Brwinów near Warsaw, where he lived all his life. His wife Wanda is also a biologist, retired academic teacher from Warsaw University, his daughter Małgorzata Julia, doctor at the SGGW [Warsaw University of Life Sciences], is also an academic.

Professor Riedel studied biology at Warsaw University in 1947–1952. In 1952 he obtained his philosophy master's degree in zoology at the Faculty of Biology and Earth Sciences, Warsaw University (formerly Faculty of Mathematics and Natural Sciences of Warsaw University), and in 1959 – doctor's degree (based on the required examinations and doctoral thesis

"Rewizja Zonitidae Polski" [Revision of the Zonitidae of Poland], at the Institute of Zoology, Polish Academy of Sciences, Warsaw). He habilitated (habilitated doctor of natural sciences within zoology) in 1967, based on the monograph "Zonitidae (excl. Daudebardiinae) der Kaukasusländer (Gastropoda)" [Zonitidae (excl. Daudebardiinae) of the Caucasian countries (Gastropoda)] at the Faculty of Biology and Earth Sciences, Warsaw University. He became extraordinary professor in 1974, and was given the degree of ordinary professor in 1991 by the then president of Poland.

The whole of professor Riedel's scientific carrier was associated with the Museum and Institute of Zoology, Polish Academy of Sciences in Warsaw (MIZ PAS, the institute changed its name twice during that time: first it was the State Museum of Zoology, then the Institute of Zoology, Polish Academy of Sciences).

Professor Riedel was first employed as assistant (still being a student), in 1949, then was promoted to the position of adjunct [lecturer] and dozent [assistant professor] (1956–1974), and since 1974 was professor. Though since 1989 he was on disability pension, and since January 1st 1999 – retired, for many years he continued working as a volunteer.

Professor Riedel held numerous positions both at the Polish Academy of Sciences and in other scientific institutions. He was Head of Invertebrate Department of MIZ PAS (1956–1972), Deputy Director for General Affairs of MIZ PAS (1971–1977), Head of the Museum of Zoology of MIZ PAS (1974–1975), Scientific Deputy Director of MIZ PAS (1978–1981), Head of Department of Morphology and Systematics of MIZ PAS (1981–1988). During several consecutive terms he was a member of the Central Qualification Commission (CKK) (1983–1988) and then member of the State Committee for Scientific Degrees and Positions (1991–1993). At the same time he was a member of the Presidium (1984–1986) and Vice-President (1987–1989; 1990–1992) of the Committee of Zoology, Polish Academy of Sciences. Professor Adolf Riedel was editor in chief of the series "Fauna Polski" [Fauna of Poland] (1970–1998) and editor and/or member of editorial boards of several scientific journals published by the Polish Academy of Sciences (among others *Annales Zoologici*, *Acta Ornithologica*, *Acta Theriologica*, *Fragmenta Faunistica*) during several decades.

Professor Riedel was a lecturer at Warsaw University in 1968/1969 and 1970/1971. He was referee of many doctoral and habilitation theses, and author of numerous opinions on applications for professorships.

Professor Riedel was a member of several international scientific societies, including Société Française de Malacologie, *Unitas Malacologica*, and Polish scientific societies: *Polskie Towarzystwo Zoologiczne* [Polish Zoological Society], *Polskie Towarzystwo Przyrodników im. M. Kopernika* [Mikołaj Kopernik

Society for Natural History], *Polski Związek Entomologiczny* [Polish Entomological Society], *Towarzystwo Naukowe Warszawskie* [Warsaw Scientific Society]. He was an honorary member of the Association of Polish Malacologists and an honorary member of the Committee of Zoology.

Professor Riedel was awarded Golden Cross of Merit and Cavaliers Cross of the Renaissance of Poland (1985). He was also awarded several prizes, awards and distinctions from the authorities of the Polish Academy of Sciences, among others awards of the Scientific Secretary of the Polish Academy of Sciences for the "Katalog ślimaków lądowych Polski" [Catalogue of terrestrial gastropods of Poland] (1989), and for the monograph "Arionacea – ślimaki krążalkowate i ślimakowate (Gastropoda, Stylommatophora)" [Arionacea – endodontid and arionid gastropods (Gastropoda, Stylommatophora)] (1976).

In 1945–1946 Professor Riedel was a member of the Polish Scouts' Association, and in 1949–1980 a member of the Polish Teachers' Association. He never joined any political organisation, either youth organisation or political party.

Professor Riedel conducted numerous field studies in many parts of the world, for example in the Carpathian, Balkan and Caucasian countries, in Greece, Austria, Italy, France, Romania, Bulgaria, Morocco, Lebanon, Iran, Iraq, Turkey, in the Crimea, North Korea and Cuba; he visited many countries for conferences and congresses; the total number of his scientific trips to various countries exceeds 50.

Professor Adolf Riedel was curator of the malacological collection of MIZ PAS which now includes more than 800,000 specimens; over 40,000 were collected by him during his field trips. His life's collecting achievement was the huge collection of the Zonitidae (Pulmonata). It is a part of the malacological collection of the Museum and Institute of Zoology, Polish Academy of Sciences in Warsaw, and includes 350 species, about 150 of which are represented by types of various categories. The collection, including both shells and valuable alcohol-preserved materials, very meticulously curated by him, is now probably the largest such collection in the World. Certainly, in Europe and the World it is the richest with regard to Palaearctic species (shells and soft parts) and to the number of species represented by type specimens.

Professor Riedel accumulated a very rich library of malacological reprints and books all of which he then donated to the Library of the MIZ PAS, which is the largest zoological library in Poland. Additionally, he created a reference library of malacological literature which is an integral part of the malacological collection.

Professor Riedel's hobby was numismatics; he accumulated an impressive and very well curated collection of coins (mainly 20th c.) from all over the World. It no doubt has a museum value.

Professor Adolf Riedel died on the 21st of August 2010. It is a great loss for malacology and for all his friends.
